## **INVITATION**

Dear Friends,

**It gives us great pleasure to invite you for the Ninth Annual Conference of Kanpur Diabetes Association "KDACON-2024" on 30<sup>th</sup> November Saturday & 1<sup>st</sup> December Sunday, 2024.**

Diabetes is emerging as a growing health challenge in the 21st-century and keeping pace the field of diabetes care is also changing rapidly.

Rapidly accumulating evidence on various aspects of diabetes care is changing the way we manage diabetes today. Landmark clinical trials have resulted in treatment algorithms, emphasizing comorbid conditions, in the selection of glucose lowering agents. Further, wider application of continuous glucose monitoring with time in range (TIR), insulin pump technologies and more detailed individualization in diabetes pharmacotherapy, have changed the landscape of diabetes care in 2024.

However, despite the tremendous amount of knowledge and advances in management tools, the quality of diabetes care still falls short of expectations.

The conference will include discussions and presentations in the contemporary challenges of day to day clinical management of diabetes. There will be state of art lectures and three interactive workshops. Special emphasis has been placed on the role of Medical Nutrition Therapy (MNT) in the management of diabetes.

PG students will also be participating in the KDACON 2024. There will be paper presentation and quiz for P.G students. There will be dedicated halls for dieticians and para medical , however they are free to attend any lecture they wish.

We are making our best efforts to make your stay comfortable and academically satisfying.

With Best Wishes,  
The Organizing Team,  
KDACON-2024
